

Agustín Benvenuto

Software Engineering student at ITBA

SUMMARY

Although I have no prior work experience, I am eager to be a part of a work team and contribute to the development of professional projects. If you are seeking someone with a focus on performance and good practices, as well as an interest in creating responsive and modern websites and applications, then I may be the candidate you're looking for.

Throughout my academic career, I have developed a strong foundation in programming languages such as HTML, CSS, and JavaScript, as well as a solid understanding of popular frontend frameworks such as React, Svelte, and Vue.js. Nevertheless, I always learning and continuously seek to stay up-to-date with the latest technologies in the field.

PROYECTS

Scheduler *Frontend*

2022 – 2023

A webpage designed to assist ITBA students to organize their academic terms by selecting completed subjects and presenting all possible course combinations.

[Svelte](#)

Wavam *Frontend*
